

Amendments to the Specification:

Please amend the specification of the disclosure as follows:

Please add the following after paragraph 18:

FIG. 7 shows a cross-sectional view of the entry region depicted in FIGS. 4 and 5.

Please add the following after paragraph 22:

In accordance with the present exemplary embodiment, the division into the region with two part-streams in the entry region 10 of the air-guiding device 4 is preferably axially-symmetrical, i.e. is effected in the radial direction, in particular in the plane defined by the longitudinal centre axis of the air duct and the centre line of the elbow, which is indicated by an axis yy in FIG. 7. This plane yy can also be defined by the longitudinal center axis of the air duct and a line perpendicular to the longitudinal center axis of the air duct located between the subducts 11 and 12.

Support for this addition can be found in the specification at paragraph 7.
